Pilvagen 46, 19142 Sollentuna, Sweden

SUMMARY

Seasoned Solution Architect with over 19 years of leadership experience in designing and delivering innovative business solutions for Fortune 20 customers, a prominent S&P 500 market research company, and a leading telecom provider in the Nordics region. Proficient in all phases of the software development lifecycle, from inception to production, with a proven track record of transforming diverse teams into high-performance units.

In the past 5 years, I have specialized in building benchmarking software solutions, designing product roadmaps, selecting optimal technology stacks, and resolving complex system integration challenges. I bring expertise in IT cloud infrastructure, integration strategies, DevOps tools and processes, and API management. Technical expertise includes Java, microservices, programming and scripting, Terraform, AWS, and a hands-on approach to problem-solving, always ready to deep-dive into technical intricacies as needed.

WORK EXPERIENCE

Telenor, Sweden

Senior Java Consultant

Responsible for maintaining BSS applications, ensuring system integration, and selecting technology stacks for telecom operations. In my current role, I focus on optimizing BSS order management, improving workflows, and ensuring efficient service delivery, aligning solutions with business needs and product goals. I focus on developing scalable applications using microservices architecture and implementing TM Forum APIs to ensure seamless integration and interoperability

Teliacompany, Sweden

Java Developer

Responsible for architecting the eSIM ecosystem to be national autonomy compliant, failsafe and having disaster recovery enablement.
Worked to create a complex credit account solution in Microservices environment. Design and architecture the solution for multi-country deployment. The B2C Credit Account business legacy migration from TIBCO to a more api and Springboot microservices based solution

Senior Java Developer

Built an internal platform developer ecosystem which improves developers' efficiency. Designed, prototyped, built the key-management solution from scratch using Hashicorp terraform and vault. Enterprise level solution is provided which can be used by the developer to built the whole package

Nielsen, USA **Team Lead**

Responsible for developing and maintaining the application, overseeing daily data management, and resolving defects of varying severities. Managed deployments of new modules and enhancements, and coordinated with the offshore team for issue resolution. Led sev-1 calls, involving multiple teams to address and resolve critical issues. Also provided technical and functional sessions to clarify complex requirements.

Nielsen, USA **Developer**

Responsible for the architecture, design, and documentation of applications. Managed a team of 14 at a China offshore location, guiding them through various stages of the development life cycle. This included training, streamlining processes, and integrating them into live systems with minimal business turnaround time. Handled proposal submission, estimation, requirement gathering, and system design for migration projects. Oversaw project tracking and health reporting to senior management.

EMPLOYER

Tata Consultancy Services
2005 - Current

Multiple Roles
India, China, US, Sweden

Mastek Ltd
2004 - 2005

Multiple Roles
India

EDUCATION

INSEAD
2022

Organization Leadership

Utkal University
2004

Bachelors Degree in I.T

CERTIFICATION

- Kubernetes CKAD
- AWS Cloud Practitioner
- Microsoft Azure Fundamentals
- Professional Scrum Master - I
- Sun Certified Java Programmer

SKILLS

•Java & Microservices

•Solution Design

•Sparx Architecture

•Terraform, AWS, Vault, Kubernetes, Github actions, Splunk,

Grafana, Kibana, Java Microservices, Spring boot, API

Management, TIBCO
